

The Cyber Conundrum

WHY WE NEED A CYBERSECURITY MOONSHOT.

Hackers are always one step ahead. How do we regain the upper hand?

The Cyber Conundrum: How Do We Fix Cybersecurity explores the complicated challenges of cybersecurity and uses lessons from history to propose a national, moonshot-style strategy to improve security in the digital age.

Key Selling Points

- 100% 5 Star Amazon Customer Reviews
- Written for a non-technical audience, the book explores the role we share in shaping our digital future
- Studies the Apollo Space Program, the quest for a polio vaccine and Allied strategy during World War II to help identify key characteristics of successful moonshots
- Thought-provoking book leverages author's exceptional storytelling style and extensive cybersecurity experience to make a compelling argument for change
- Multiple formats make the book accessible no matter how readers like to consume content
- Author has a loyal readership following first edition of **The Cyber Conundrum** released in 2018

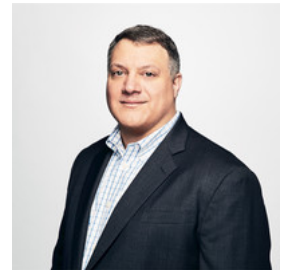

Reviews

"...the book takes a critical look at today's technology supply chain, human behavior and the role of government and corporate leaders in solving today's Cyber Conundrum." – **Patrick Gaul, Executive Director, National Technology Security Coalition**

"This is a must read for all in the cyber security field and, in fact, a must read for all who are concerned about our digital future." – **Roy E. Hadley JR, Partner, Thompson Hine LLP**

Author

Pete Chronis is a well-respected technologist who travels the world as a photographer, writer and storyteller.

Chronis has a passion for history and a knack for conversation-style storytelling—a skill he honed for decades as a tech executive.

He was the inaugural security executive at several Fortune 500 companies. He has led teams that have developed a web of proprietary and commercial security technologies that together blocked nearly 1 trillion security threats and prevented more than \$100 million in fraud.

His second book, **Hidden Lessons from History** is a photobook that explores some very famous historical contradictions and to honors those who made contributions lost by time.
